

After School Activities

Primary Dutch Bilingual

Dear parents,

We have been working hard to realize an after school activities program at our new location at the Jan Luikenstraat, and we are happy to inform you that many instructors are willing to join us at our new location.

On the next pages you can find the schedule for and a description of the After School Activities for the first cycle, which runs from September 30 to January 30. On study days there will be no activities. On Monday, Tuesday, Thursday and Friday, students go straight to their activity after school. They may bring a snack to eat at the start of the activity. On Wednesday we will organize lunch supervision for all students who are going to after school activities. The children can bring a packed lunch then. Make sure you look at the age groups the activity is for, so you sign your child up for the right activities.

If your child goes to the BSO, please inform the BSO of your child's after school activities. We expect you to pick up your child on time after the activity. At the end of the activity, you are responsible for the safety of your child. Children that go to BSO will be brought to the BSO after the activity.

ASA Schedule 1st cycle

Monday (14 sessions)				
Activity	For groups:	Time	Price	Location
Little Engineers Academy	1 - 8	15:30 – 16:30	€154	Art Room
Tuesday (15 sessions)				
Activity	For groups:	Time	Price	Location
Mad Science	3 - 8	15:30 – 16:45	€240	Art Room
Chess	5 - 8	15:30 – 16:30	€112,50	Aula
Wednesday (15 sessions)				
Activity	For groups:	Time	Price	Location
WildWoozt	1 - 8	13:00 – 14:00	€105	All around JLS
Buddies Book Worms	5 - 8	13:00 – 14:00	€90	Library
Thursday (13 sessions)				
Activity	For groups:	Time	Price	Location
Art	1 - 4	15:30 – 16:30	€104	Art Room
Dance (hip-hop)	5 - 8	15:30 – 16:30	€85	Gym
Friday (11 sessions)				
Activity	For groups:	Time	Price	Location
Yoga	2 - 5	15:30 – 16:30	€66	Gym

Description of activities

Art	Being creative is more than being able to draw. It's the way you see the world, the way you think and the way you solve problems. You don't need to be able to draw or paint to join the art classes, you just have to be ready to have a good time experimenting with different techniques and mediums.
Buddies Book Worms	Do you love reading? Books about adventures, funny stories, friendship or mystery? Then join our lovely Miss Bridget after school in the Library Book Club. We will spend time each week reading and talking together about books, authors, exploring the library and sharing what you like to read. With a cup of tea, great discussions and wonderful books. *This will only be available in English
Chess	Playing Chess will help you to develop your brain in ways no other activity does! It is fun and challenging!
Dance (hip-hop)	Who comes to dance to modern music after school. The teacher teaches us real cool moves!!
Little Engineers Academy	Designed for curious, creative children with problem-solving skills, the Little Engineers Academy Club Class aims to nurture them as individuals who do not just consume technology but also create it. In our classes, children acquire fundamental skills in science, technology, engineering, and mathematics (STEM) while also building self-confidence through hands-on projects. Your children will learn engineering principles by constructing their own robots, creating animations, and exploring future technologies. This club offers a unique opportunity for them to learn while having fun, developing their creativity and social skills. Additionally, during the course, your children's talents will be analyzed, and parents will receive a detailed analysis report highlighting their children's abilities. This report will provide insights into which areas your children excel in and what future opportunities might be best suited to their strengths. Join us in this exciting journey for your children!
Mad Science	Mad Science has created a vast library of unique after school programs. Our spectacular demonstrations, hands-on activities, and real world discussions make learning about science fun for kids! Our interactive, one-hour after school science programs are themed around particular areas of science and include such topics as rocketry, magnets, polymers, and even the science of toys. This is science like you've never experienced before!
WildWoozt	Super exciting activities for all students, they are going to play games from lasergame to archery shooting outdoor (indoor in case of very bad weather). It's a great way to explore and improve motor skills and really learn to enjoy outdoor playing. As the students will play outdoors, it's essential that students wear clothes which can get a bit dirty.
Yoga	Children's yoga is a mix of yoga poses, concentration exercises, breathing games, children's massage, yoga games and creative skills. Dynamics and relaxation alternate. Yoga is not about competition or achievement. There are no winners or losers, no right or wrong. You can be who you are. This leads to self-confidence and self-esteem.
